

AMAN SINGH

8210521367 Dwarka Sector-3, New Delhi, amansingh0645@gmail.com 9661622233 110078

SUMMARY

Computer application professional with skills in Python, React.js basics, web technologies, SQL, and Excel. Looking for an entry-level IT or data support role to apply technical and analytical skills in a professional environment.

EXPERIENCE

Bhartiye Products — E-commerce Technology & Data Analyst

New Delhi | MAY 2025 – DECEMBER 2025

- Managed E-commerce systems and dashboards (Amazon Seller Central, Etsy Dashboard, Excel, MS Office 365) to automate order processing, tracking, and daily reporting.
 - Analyzed large datasets related to product sales, traffic, and pricing trends using data tools like Excel formulas, pivot tables, and macros.
 - Implemented technology-driven solutions for catalog optimization, stock reconciliation, and return management by integrating E-commerce dashboards with internal tools.
 - Coordinated with tech teams to troubleshoot dashboard or listing errors, ensuring smooth platform functionality and zero downtime.
 - Designed and maintained structured datasets for tracking SKU performance, sales trends, and customer metrics to support business analytics.
 - Used keyword tools, SEO software, and content analytics platforms to improve digital visibility and optimize product pages.
- Developed and shared weekly performance reports using Excel automation, data visualization, and IT-enabled dashboards.

PROJECTS

E-Commerce Web Application | FastAPI, ReactJS, SQLAlchemy (LINK)

- Built full-stack e-commerce system with user login, product management, cart and order features.
- Designed database models and REST APIs using FastAPI & SQLAlchemy.
- Implemented cart system with automatic stock management.
- Frontend developed in ReactJS and integrated with backend APIs.

Project: Snake, Water, Gun Game (Python)

- Developed a command-line based game in Python where the user plays against the computer.
- Implemented random module for computer's choice and conditional logic to decide the winner.
- Practiced using dictionaries for mapping inputs and applied clean if-else structure for game rules. Learned handling user inputs, error cases, and improving game flow.

Smart Text Lab – Text Analysis Web App (React.js Project)(Link)

- Developed a responsive React.js web application for real-time text analysis and formatting. Implemented features such as
- uppercase/lowercase conversion, extra space removal, kebab-case formatting, and instant text copy.
- Designed interactive UI with dark/light theme toggle, live word & character counter, and reading time estimation.
- Optimized user experience using Bootstrap components and clean component-based architecture. Technologies: React.js, JavaScript (ES6), Bootstrap, HTML5, CSS3.
-
-
